

Claims

[c1] Our design specification claim in figure 1 show a minimum 5 layers of materials will be used to construct this unique mattress. The mattress design is unique in several ways.

1. The shape, look and style are similar to an adult size mattress produced by prominent adult mattress companies, such as Simmons, Sealy, Serta.
2. The size has been reduced to the final dimensions of about $51 \frac{5}{8} \times 27 \frac{1}{4} \times 9$ ". This dimension will allow for it to fit into suitable size toddler cribs with adjustable base height or deep setting base.
3. The mattress construction is termed as a non-flip mattress meaning the sleep surface is constructed on one surface only. The bottom surface covering is made of protective material only and is not a sleep surface.
4. The mattress will also contain a customer selected or pre-inscribed label carrying sentimental messages or information regarding the child's persona or description to add a personal touch.
